

First Meeting

- Your feet are examined by our professionally licensed chiropodist
- Feet are scanned with GaitScan™ for a detailed assessment

- A plaster cast is taken of your foot held in subtalar joint neutral
- Your cast and prescription form are taken by our lab technicians to produce your orthotics

A Life Long Relationship

- Your orthotics are ready for your use so you can experience a healthier way of living for years to come

Getting to Know You

Orthotics are prescription medical devices designed and fabricated to the unique shape of your foot. Orthotics adjust and control the functions of the foot and its alignment with the lower leg.

Get Familiar With Your Feet

Family Footcare is dedicated to delivering high-quality health care for your feet and foot related conditions. We specialize in custom orthotics and treatment of foot ailments such as warts, corns, calluses, ingrown and fungal nails as well as heel and arch pain. Our professional staff offers the best diagnosis and treatment options. Our focus is you.
